Is this a "Fast & Focused" Search Request? (Circle One) ☒ YES ☐ NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC3600 and on the EIC3600 NPL Web Page at <http://ptoweb/patents/stic/stic-ic3600.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

generic means without the actual name of the hotel
claim - generic item (anything - w/ availability checking)
hotel
inventory
airline
drugs
rental car
deep
discounts
summer when
identity not revealed (until after purchase)
["remove label"] - Gabriel brothers

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (original): A hotel reservation system, comprising:

a hotel master database operable to store generic information and specific information associated with one or more hotels;

an inventory database operable to store a number of rooms available at the hotels on one or more dates and a price of each room; and

a reservation engine operable to:

receive a hotel availability request, the request including one or more parameters;

access the hotel master database and the inventory database to obtain information associated with the request;

determine one or more hotels that meet the parameters of the request in response to obtaining the information from the hotel master database and the inventory database;

communicate a list of the hotels meeting the parameters, the list including at least one generic hotel listing;

receive a reservation request for a hotel associated with a generic hotel listing; and

create a reservation according to the reservation request.

Detailed Description

Detailed Description

... sub-queries to another process.

When a shared RC file is implemented as a hash table, as described
 above, the queryforwarding process depends on the hash table
 representation of the RC file, and generally requires code to compose
 a flight availability query from a list of Rights ("query forwarding
 availability query"). In other words, an availability server process
 now acts like a client.

Typically, an availability query has an associated timeout -- the
 amount
 of time the client is willing to wait...

Detailed Description

Detailed Description

... sub-queries to another process.

when a shared RC file is implemented as a hash table , as described
above, the queryforwarding process depends on the hash table
representation of the RC file, and generally requires code to compose
a flight availability query from a list of Rights ("query forwarding
availability query"). In other words, an availability server process
now acts like a client.

Typically, an availability query has an associated timeout -- the
amount
of time the client is willing to wait...

Description of the Invention:

...consumer compilation of one or more recipes of a given meal plan, the consumer can request printing of the recipe and a shopping list. The information contained on the shopping list can include, in addition to an integrated listing of brand name and generic ingredients, the location of the individual ingredients in the market (preferably by aisle number and shelf location) and the price of each item in either the recommended, or the available, quantity. The total price of the shopping list could also be calculated in advance...

Description of the Invention:

...In some situations the name type for an item prescribed for a patient may not be available in the dispensers connected to the display terminal or otherwise available in the area adjacent the display terminal. The display terminal or connected computer may be programmed responsive to a request to dispense an item by a trade or generic name which is not available, to indicate on the display terminal that the item is available under an alternative name. The user in response to receiving such an indication, may toggle button 252 and dispense the item under its alternative name. In such situations, the user may also consider this a discrepancy which should be recorded in response to the user prompts generated in response to selecting the discrepancy button 250. The ability of the system to track items by...

... device listings, was demonstrated at the WESCON '88 Exhibition in
Anaheim, California, November 15-17.

Available on CD-ROM (Compact Disc - Read Only Memory), the IC/SC
PARAMETER DATABASE Service contains over 790,000 active and
discontinued device listings from 450 U.S. and international
manufacturers. Listings feature detailed parameter information,
including package outlies, pinouts, manufacturers' datasheets, and
sales office listings for easy product
identification and alternate
sourcing. Device listings are searchable by characteristic
(parameter), generic part number, manufacturer part number and
function. Search results are displayed either as logical spreadsheet
layouts that provide easy, side-by-side product comparisons or by
individual device listings.

As part of the MASTERNET (TM) Electronic Information Service, the

Systems Become Interactive and Integrated
Stusser, Daniel I.
Networking Management v10n4 PP: 49-56 Mar 1992
ISSN: 0746-6072 JRNL CODE: TPT
WORD COUNT: 4187

...TEXT: functions.

Of course, dozens of vendors claim that they were always operating on a platform product ...the PC. These applications developers, while building no hardware themselves, use the term "platform" to describe what they do.

The PC vendors claim several advantages to using generic hardware--that it's easy to repair and very reliable and low in price. But they especially point to the hundreds of products that are available to add fax, database access, T1, and other interfaces to their voice response or voice messaging systems. The limitations of PCs are hotly debated, and have to do...

... of network adapters, and this was helpful too. We would expect the windows and Macintosh products to offer a better way to create host tables to map alias names to IP addresses.

Users must look to their own requirements to select the right product. In almost every case, there is no getting around the complexity of Unix. Telnet itself...

... changes each time we run this program, we assign an alias to our temporary line- items database. As a result, we can refer to the work area that contains our temporary line- items database as temp in any command that accepts an alias name.

Adding the EXCLUSIVE clause to the USE command tells FoxPro not to share this database. Since the temporary database file name is unique, you might wonder why the EXCLUSIVE clause...
